Climate normals Pilatus

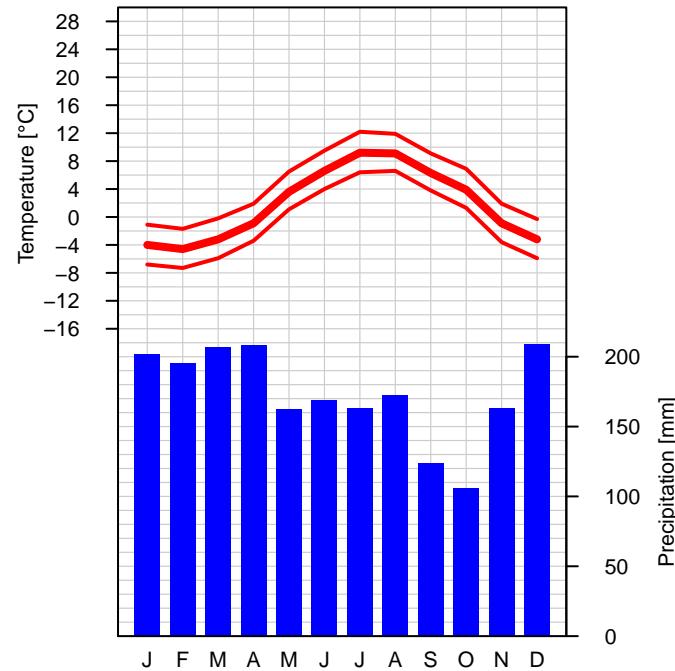

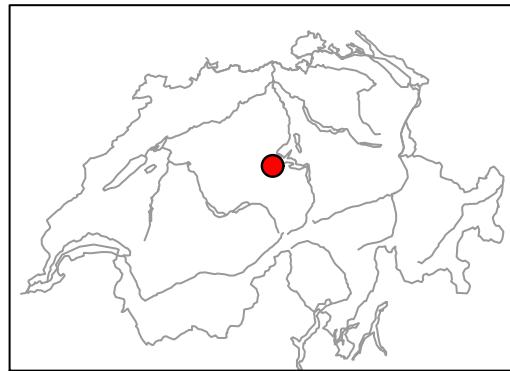

Reference period 1981–2010

Legend:

Climate graph:

Graph showing long-term means of monthly mean temperature, mean monthly maximum and minimum temperature as well as monthly precipitation sums of a certain measuring site.

Table:

Long-term means of monthly mean values and monthly sums of different climatological parameters. Missing values (no measurements or measuring period shorter than 10 years) are labeled as "-".

Temperature [°C]

monthly mean temperature

Maximum temp [°C]

monthly mean of daily maximum temperature

Minimum temp [°C]

monthly mean of daily minimum temperature

Ice days [days]

number of days with maximum temperature below 0° Celsius

Frost days [days]

number of days with minimum temperature below 0° Celsius

Summer days [days]

number of days with maximum temperature equal to or above 25° Celsius

Heat days [days]

number of days with maximum temperature equal to or above 30° Celsius

Relative humidity [%]

monthly mean of relative humidity

Precipitation [mm]

monthly precipitation sum

Precipitation [days]

number of days with precipitation equal to or above 1 mm

Snowfall [cm]

monthly snowfall sum

Snowfall [days]

number of days with snowfall equal to or above 1 cm

Snow cover [days]

number of days with snow cover equal to or above 1cm

Sunshine [h]

measured sunshine duration

Sunshine [%]

ratio of measured sunshine duration to possible sunshine duration

Bright days [days]

number of days with sunshine duration greater than 80%

Cloudy days [days]

number of days with sunshine duration less than 20%

Period:

First and last year of analysed period. Possible gaps in the data series are not separately mentioned.

Homogeneous data series were used to calculate long-term means except for parameters shown in italics. The values can change due to continuous quality control and homogeneity updates. Further information on the Swiss climate and on the homogenization topic can be found on www.meteoswiss.ch.
